DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/25/2010 has been entered.

Status of Claims

Claims 1-16 are currently under examination, wherein claims 1, 11, 12, and 13 have been amended in applicant's amendment filed 5/25/2010. The examiner agrees that there is no new matter.

Previous rejections of claims 1-4 and 8-15 under 35 USC 103 as being obvious over Yadav et al. (U.S. Patent No. 6,572,672), claims 5-6 under 35 USC 103 as being obvious over the combined teaching of Yadav in view of Oshida (U.S. Patent No. 6,183,255) and claims 7 and 16 under 35 USC 103 as being obvious over the combined teaching of Yadav in view Davidson (U.S. Patent No. 5,415,704) are withdrawn in light of applicant's amendment, arguments, pages 5-8 of the response.

The declaration under 37 CFR 1.132 filed May 25, 2010 by Dr. Thosmas Webster has overcome the rejection of the claims based on Yadav alone and in view of Oshida and Davidson. The declaration by Dr. Thomas Webster is convincing in that that by properly consolidating the nanoparticles, i.e., controlling the process conditions such as temperature, pressure and composition of the compressed materials, the agglomeration is reduced or avoided and as the result the final product would not have an increase in particle size and increase surface

roughness. The product taught by Yadav would not have the same particle size and surface roughness as the Applicants since the process for forming consolidated product of Yadav is not controlled and is different than the Applicants as evidenced by the process disclosed in Example 8 of Yadav and that of the Applicants in paragraph 0013-0015 of the specification.

Claims 1-16 are allowed.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

None of the prior art references teaches the claim biomaterial which is formed of consolidated formed of consolidated metal nanoparticles wherein the material has a grain size less than about 500 nm and has a surface roughness less than 500 nanometers root mean square (nm rms).

Yadav teaches using nanoparticle to form consolidated article. Yadav does not teach or suggest forming a final product that has nanoscale dimensions, such as nanosize particles and surface roughness. The consolidated product taught by Yadav would not inherently have the claimed grain size and surface roughness of less than 500 nanometer root mean square since the method of making the consolidated product of the applicant is different than that of Yadav as evident by Example 8 of Yadav reference and applicant teaching in para 0013.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NGOCLAN T. MAI whose telephone number is (571)272-1246. The examiner can normally be reached on 8:30-5:00 PM Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King can be reached on (571) 272-1244. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
